

Holland Bazaar

250kWp Commercial Rooftop Solar PV

Fast commercial solar delivery on a live retail and cash & carry site.

SOLAR PV

250kWp

INSTALL DURATION

Around 3 weeks

INDUSTRY NORM

6+ weeks

PAYBACK

Approx. 3 years

Why it matters

CHALLENGE

The project needed a high-output commercial rooftop system delivered quickly around live-site access, roof works and commissioning requirements.

WIRE NOW APPROACH

Wire Now coordinated the installation programme, site access and commissioning sequence so the 250kWp system could be delivered in around three weeks.

OUTCOME

A 250kWp rooftop solar project was installed in roughly half the common 6+ week programme, with an approximate 3-year payback based on supplied project figures.

Use this in bids when the buyer needs proof of commercial solar delivery.

For constrained-grid sites, start with a Grid Constraint Audit and feasibility pack.
